Rugged notebooks

Twinhead Corporation has launched its DURABOOK D13RY and D14RY models, featuring lightning-fast Intel Core Duo and Core 2 Duo processors, as well as optional TPM 1.2—a hardware-based security technology that meets the highest international requirements for data protection. The DURABOOK D13RY is a mobile multimedia center with 13.3" WXGA TFT LCD screen, 1.3 megapixel webcam, and four 1-watt stereo speakers. The D14RY is built for the road warrior and includes a non-glare 14.1" XGA TFT LCD display. Both new DURABOOKS offer a magnesium-alloy case that is 20 times stronger than ABS plastic.
