

Magnesium alloy-encased notebook

The 13.3-inch fully rugged **GammaTech** R13S notebook comes fully encased in magnesium alloy, offering the ultimate in flexibility and functionality. Its sunlight-readable WXGA convertible LCD screen is viewable in any light level and transforms easily for tablet PC applications. Operable in temperature extremes ranging from negative 4 degrees F to 122 degrees F, the R13S is the perfect choice for mobile rugged computer users working in harsh environments. As with all GammaTech rugged notebooks, the R13S is listed in EPEAT for environmental performance.
