

Rugged Mobile Solution

GammaTech, a manufacturer of rugged notebook and tablet computers, announces the newest addition to its line of rugged mobile solutions, the S15C.

Designed for rugged environments, the S15C provides portability and it's tough enough to be used virtually anywhere. It's tested by Military 810G standard, which ensures that it's drop, shock, dirt and spill resistant.

The S15C features a 15.6-inch (396-mm) HD display, comes with Intel i7, i5 and i3 processors and Intel HM55 chipset, and its two dual-channel DDR III SODIMM slots provide up to 8 GB of memory capacity. Security is of paramount importance and the S15C includes multiple security features such as TPM 1.2 technology, Kensington Lock connector, administrator password/boot password and smart card reader slot.
